

EMS Medical Direction

The following articles were selected from a literature search performed on the National Library of Medicine's PubMed database in February 2004 by *EMSMJ* staff. The results of the search were manually edited to only include those citations which were deemed pertinent to the general topic of EMS medical direction and related issues of online medical control and physician roles in prehospital care. The editing process was made by review of the title and journal in the citation - the actual source documents were not reviewed in this process.

Citations appear in alphabetical order by the last name of the lead author. The PubMed database only goes back to 1966, so citations pre-dating 1966 will not appear in this listing. To retrieve any of these citations via PubMed, go to www.pubmed.gov and type the PMID number into the search box.
